

HM 200 Ecoline – Special Enzed Package 12v or 24vDC

Crimp Force kn/tonne	1300 / 130
No Grease Technology	Yes
Parker 43 series, 71 series, fittings (up to 721 TC hoses). (Full crimp chart available on request)	Up to –24 hoses or 1 1/12"
Parker 43, 71, 77, 78, series Fittings. (up to 787TC and 797TC hoses) (Full crimp chart available on request)	Up to –20 hoses or 1 1/4"
Industrial Hoses	2" light duty
Maximum Crimp Diameter	70mm
Crimp Path (die Size + 30mm)	30mm
Max Opening (without Dies)	100 mm
Drive Method	12vDC or 24vDC Hydraulic Power Unit (included)
Die Series	239
Oil Capacity (litres)	4 litres of 46 grade hyd oil
Length x Width x Height	420 x 535 x 520
Weight	88 kg
Dies in Standard Package (Die Length is 60mm to 75mm)	16,17,20,22,24, 26,28,31,32,36, 38,40,44,50,57
Optional extra Die Sizes Available for Purchase	6.8, 9, 12, 14, 47,54, 62

Description and Features

- **This HM200 ecoline package has been packaged specifically for the DS8 replacement programme and meet the 15 dies recommendation for Enzed franchises**
- This model is really aimed at the 1 ¼" hose market and below in both straight and elbow fittings but is capable of 1 ½" in 2SN or 4SP providing the crimping force required does not exceed 130 tonne.
- **The machine comes with 15 die sets but there is a good range of optional extra dies available which go down to 6.8mm and up to 62mm**
- Crimping diameter is set with a micrometer and limit switch assuring accurate repeatable crimping
- **All Uniflex crimpers have "grease free dies technology" for reduced frictional losses and long life**
